

The Future Of Autonomous Surveillance

SentryPODS Is A Turnkey Surveillance Solution

1

Unit Detects Threat
At Remote Location

2

Central Monitoring Verifies The
Event & Notifies Authorities

3

Threat(s) Neutralized By
Appropriate Authorities

4

Peace Of Mind At A
Safe Distance

Remote Surveillance: Backed By Human Intelligence

SentryPODS (Remote Surveillance Camera Systems) has partnered with US-Based video surveillance monitoring companies to deliver 24/7 live monitoring of motion, invasion, smoke, flare, or flame. With live monitoring, we include the human intelligence/recognition that AI is not yet capable of handling. Each security monitoring technician knows to look for threats and will immediately call the proper authorities if an incident is validated.
